(Hard to believe? Visit our Testimonials page on our website above!!! We are the real deal and have a proven track record!)

Forecasting & Budgeting in *your* Real World! How to plan and spend for profit.

Are you tired of struggling to just get by? Do you know you can do more with your business than you are? The first steps in bringing your dreams to reality is forecasting and budgeting specifically for your shop in a real world environment. This seminar, designed for owners & managers, will give you real world practical systems, tools, and focus you can use immediately in your business to see increase. Lack of clarity prevents you from stepping into your greatness. Valuable lessons given in this seminar:

1. How to best read a P&L (Profit & Loss) statement to drive your business forward.
2. The P&L profitable business cycle: Where does a profitable P&L REALLY come from?
3. Forecasting Sales, Cost of Goods Sold (COGS), Gross Profits, and Budgeting Expenses.
4. Memory stick of tools to facilitate Forecasting & Budgeting in your automotive environment.

With the current economic times putting even more stress on businesses and business owners, every penny counts. Every move you make is critical and has a direct impact on the bottom line. This is a Nuts & Bolts seminar on learning real world financials for both mechanical and collision shops. You don't need to be a math wizard or have a business degree to understand the real basics for moving your business in the right direction.
